What is e-BizMail Software?

e-BizMail is an Electronic Business Mail sending software, by using e-BizMail software your mails will go automatically one by one to the recipient, since this is a personalized mailing system it gives better response. You can use e-BizMail software to send your Newsletters, Greetings, Special Announcements etc.

How Mails are sent from e-BizMail software?

With e-BizMail software your mails will go individually to the recipient with email list created by you. It will not go using CC or BCC method, so user will feel that its specially sent to him/her it is 100% personalized and hence it gives better response.

How does it work?

e-BizMail is a very user friendly software. You can start sending mails just in 3 simple steps. Start sending mails without worrying about whom you have sent and to whom you forgot to send.

e-BizMail will remember the recipients whom you have already sent mails, those recipients Email IDs which got failed in earlier attempt etc. You can also schedule your mails so that your mailing will start automatically on a specified time. There is also an auto Turn off computer facility so your Computer will shut down automatically when your mailing is over.

What's special in e-BizMail software?

e-BizMail software supports HTML mails, it would be more attractive and faster, you will also have the delivery status report which will tell how many mails you have attempted, sent, failed etc. with date wise listing. e-BizMail software provides a very important feature which will remove the user's Email Address from your mailing list by simply clicking a link provided on your mailer, this saves your time and also keeps your mailing list updated.

Another important feature of e-BizMail software is the Direct Mailer, where you can type in your message directly and also use HTML templates, so that you don't have to type again and again the common matter that you send regularly.
